## PROJECTS

### 1. Portfolio, Web Application

September 2023 – present

- **Description** : Designed and implemented a visually compelling web application to serve as a showcase for my professional qualifications, skills, and project portfolio. Leveraging the power of ReactJS, I created an interactive platform that not only highlights my technical expertise but also engages users with a seamless and intuitive experience.
- **Technology** : React.js
- **Team size** : Solo Project
- **Role** : Frontend Development

### 2. Medicos Clan, Web Application

August 2023 – November 2023

- **Description** : With this project, I was aiming to unite all the doctors and their patients under a single platform. An idea to enable a channel for communication of the registered users through posts and comments.
- **Technology** : MERN stack
- **Team size** : 4
- **Role** : Frontend Development

### 3. Railway Management, Web Application

March 2022 – April 2022

- **Description** : Led the development of a comprehensive web application aimed at streamlining railway operations and enhancing the overall user experience. This project involved creating a robust platform that efficiently manages the details of booking trains, services, railway news, and provides information about food and nearby hotels..
- **Technology** : HTML, CSS
- **Team size** : Solo Project
- **Role** : Frontend Development
